Fetching current location

Filled address details automatically using the current location feature

The screenshot shows the Hungrio mobile application interface. On the left, there's a sidebar with a cart icon containing two items: a Veggie Burger and Spaghetti Carbonara. Below the cart are sections for 'Bill Details' showing item total, delivery charge, GST and platform charge, and total pay. In the center, a modal window titled 'Choose delivery address' is open. It contains a sub-modal 'Add New Address' with fields for Street Address, City (set to સુરત), State (set to Gujarat), Country (set to India), and Pincode (set to 395006). There's also a checkbox for 'USE MY CURRENT ADDRESS'. At the bottom of this sub-modal is a 'SAVE' button. To the right of the sub-modal, there's a note 'Please Fill Precise Street Address' with a close button. Below the 'Add New Address' section, there are three address suggestions: '44, Yamuna Nagar Society, Surat, Gujarat, India', '321 New Street, B/H Ganga Jamna, Nana Varachha, Surat District, Gujarat, India', and 'abc street, સુરત, Gujarat, India'. Each suggestion has a 'SELECT' button. At the very bottom of the screen is a red 'PROCEED TO PAY ₹680' button.

Address successfully added

This screenshot is from the same Hungrio app as the previous one, but it shows the result of adding a new address. The 'Add New Address' modal is now closed, and a success message 'Address added successfully' is displayed in a toast notification at the top right. The rest of the interface is identical to the first screenshot, including the cart items, bill details, and the list of suggested addresses with their 'SELECT' buttons.

The screenshot shows a restaurant page for "Lettuce Eat Bistro". At the top right, there is a notification bubble that says "Your cart contains items from other restaurant." with a small icon of a shopping cart and a '2'.

The page includes the restaurant's name, address (Mumbai, Maharashtra), and operating hours (Mon to Fri - 10:00 AM to 12:00 PM).
